Professional Summary

AI/ML enthusiast and Full Stack Developer pursuing a Bachelor of Technology in Computer Science and Engineering at Jaypee University of Engineering and Technology (JUET), Guna. Skilled in building intelligent machine learning applications, scalable backend systems, and responsive web applications using Python, FastAPI, JavaScript, and MySQL.

TECHNICAL SKILLS

- Programming Languages:** C, C++, Python, JavaScript
- Frontend:** HTML5, CSS3, JavaScript
- Backend:** FastAPI
- Machine Learning:** Scikit-Learn, XGBoost, NumPy, Pandas, Matplotlib
- Database:** MySQL
- Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook
- Core Concepts:** OOP, Data Structures & Algorithms, DBMS, Operating Systems

EXPERIENCE

Machine Learning Intern | CodTech IT Solutions Private Limited | Duration: 4 Weeks

- Worked on machine learning and full stack development projects. Built and deployed AI-powered applications using Python, FastAPI, and modern web technologies.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) Jaypee University of Engineering and Technology (JUET), Guna | 2024 – 2028

- CGPA:** 8.1 / 10

CERTIFICATIONS

- Infosys Springboard: C,C++ (2024)**
- Infosys Springboard: HTML5,CSS3 (2025)**

Projects

AI Phishing URL Detection System

- Developed an AI-powered phishing URL detection web application using Machine Learning.
- Tech Stack:** Python, NumPy, Pandas, FastAPI, Scikit-Learn, HTML5, CSS3

Smart Rain Prediction System

- Developed a real-time weather dashboard with intelligent rainfall prediction. Integrated weather APIs to display hourly forecasts and rain probability.
- Tech Stack:** Python, FastAPI, JavaScript, Leaflet, Weather APIs

Network Intrusion Detection System

- Developed a machine learning model to detect malicious network traffic. Applied data preprocessing and classification algorithms for intrusion detection and improved network security.
- Tech Stack:** Python, FastAPI, Scikit-Learn, Streamlit

SmartBMS IoT Predictive Maintenance & Thermal Runaway Forecaster

- Developed an AI-based Battery Management System for predictive maintenance. Implemented battery anomaly detection and thermal runaway forecasting for EV battery safety and reliability.
- Tech Stack:** Python, Scikit-Learn, Streamlit
